Goggles, Blast,
BS EN 166 : 1S

S1

Polycarbonate goggles in two formats, both having an adjustable ball-pivot strap, and with an exceptionally wide field of vision and anti-mist and anti-scratch coatings. The standard goggle offers indirect ventilation. Cleanroom goggle has indirect vents, is uncoated and is fully autoclavable at 121°C. The strap is non-linting.

Faceshield, chemical splash only,
Clearways, BS EN 166 : 3F

S1

Light, strong and comfortable. The browguard is moulded from polypropylene for extra strength and incorporates an economical method of visor fixing. The unit has a fully adjustable head harness with an elasticated nape strap and a front comfort band. Features a special tensioning device allowing the visor to be locked into the up or down position, or to use a 'nod-down' facility.
